

Program Update

Engine Purchase/Leaseback Program

If you are interested in flatlining your operational costs, or you need access to working capital to assist your operation during the Covid-19 recovery, contact us about the ATS PT6A engine purchase/leaseback program for qualified fleet operators.

ATS will purchase your serviceable engines on-wing at a competitive price, and then lease them back to you at a reduced flight hour rate. We have the flexibility of structuring a lease that includes 0% to 100% scheduled maintenance to balance your need for cash or the desire to avoid the variability of your MRO expense.

Please contact one of our regional sales representatives to learn more about participating in this program.
