

Program Update

Engine Inspection Program

RE: Waiver of Engine Inspection Fees

In an effort to provide support to operators during the Covid-19 recovery we are temporarily waiving engine inspection / release fees.

There are numerous historic examples of some engine shops quoting ridiculously high inspection / release fees (aka "hostage fees"). We don't operate that way at ATS. Our inspection charge has always been considerably lower vs. our competitors, and with this program update if ATS presents you with an MRO quote that you choose not to authorize we will release your engine back to you for \$0.

We want to make it easy for you to know what your MRO options are without the risk of ransom. Remember, even if you don't use ATS for your PT6A engine work, you should always ask your MRO provider to provide you with a fixed price release / inspection charge up front (before your engine is inducting into their work queue).

If you find yourself in a hostage situation with another shop, please contact one of our regional sales representatives for help. In many cases, ATS can provide you an MRO quote for comparison that leads to a more economical outcome ... even after paying the other shop's ransom fee.
