

Program Update

Power by the Hour Rescue

We've recently been contacted by several operators asking for help with their power by the hour programs. They are realizing through simple math and hard lessons that the rates they are paying are significantly higher than traditional maintenance arrangements.

Give us a call if you find yourself in this predicament. ATS offers several service and lease programs that provide dependable / flatlined maintenance cost without termination penalties or costly betterment footnotes and exclusions. We will help you transition away from the program you are trapped in and regain cost effective management of your fleet.

Please contact one of our regional sales representatives when you realize your power by the hour program isn't turning out to be such a good idea.
